

Description

PA Jet Nozzle (Model: JN) is designed for Supply Air application for AC System. It is suitable for wall mounted and long-range throw distance applications and standard constructed from extruded aluminium. Finishing for JN is standard powder coated in white colour, other colours are available upon request.

Installation Guideline

1. Accessories Connection

List of available accessories for JN:

- Fan Blade Damper (FBD)

All accessories used for the JN must secure and tighten to the back of the JN with the use of a minimum of two M5 self-tapping screws on each side of the neck of the JN before the installation work can be carried out

2. Opening Clearance

The hole opening on the wall or ceiling shall be larger than the combination of the JN's neck with its respective accessories combination to permit the installation of the system and the gap should be within 5mm of the overall size of the JN's neck and its accessories combination.

3. Installation Detail

A. Countersunk Screw Mounting

Open the cover of the JN and insert the JN into the opening hole. Then directly secure the JN to the wall with the use of an M5 self-tapping screw on the frame of the JN, tighten it until the surface of the JN is flush with the wall. Lastly, cover the JN with the cover.
