

Description

PA Access Door (Model: AD) is designed for users to access the ductwork of the ACMV System for ease of maintenance and inspection. Besides standard constructed from galvanised steel (GI), stainless steel material is available upon request. For the door, it is internally insulated with fiberglass insulation.

Installation Guideline

1. Opening Clearance

The hole opening on the ducting shall be larger than the combination of the AD's neck to permit the installation of the system and the gap should be within 5mm of the overall size of the AD's neck.

2. Installation Detail

A. Countersunk Screw Mounting

After insert the AD into the opening hole, direct secure the AD with the use of an M5 countersunk screw on the frame of the AD tighten it until the surface of the AD is flush with the ducting.
